

## Franz Harary

In the history of magic, Franz Harary is truly unique -- he is the first world-class magician ever to design and create all of his own illusions, as well as perform them live before mesmerized crowds. This was best demonstrated on an NBC-TV special in November, 1994, when Harary vanished the Space Shuttle before a live audience at Kennedy Space Center. Since the fall of 1991, Harary has been boggling the minds of audiences throughout Asia where he received rave reviews and was constantly mobbed in the streets of Hong Kong, Jakarta, Malaysia and Singapore. Incorporating a life-long love of both music and magic, Harary became well-know throughout his home state of Michigan as an extraordinary boy who could dazzle crowds with large scale illusions.
